Made for iPod iPhone

Highlights

A great spare or replacement
The 30-pin to USB cable is essential for syncing your iPhone or iPod with iTunes, and for charging via your computer or USB charger. Carry it with you, keep it at your desk, or replace the one you lost so you're always able to connect and charge when you need to.

Integrated, flexible stand
The dock-connection end of the cable is made to flex and bend into a stand, giving you a proper place to sit your iPhone or iPod by your computer.

Stand vertically, horizontally
The stand works in both portrait and landscape mode, so it will let you dock your iPhone or iPod either vertically or horizontally.
